

Hot Vent #9174

The Safest tent heater ever! Simply place the heater outside the tent and insert the air tubes through the tent door. A small fan (hidden inside the cold air duct) connects to any 12 volt battery. In just seconds, safe dry hot air flows into your tent. Designed with a sealed heat exchange, dangerous gases and smelly odors stay safely outside the tent. Includes hard case for extra protection during storage and transport.

Product# 9174
